Contents of volume 49

Research Papers

Structural permeability effects on the interaction of a solitary wave and a submerged breakwater
C.-J. Huang, H.-H. Chang and H.-H. Hwung 1

Fixed absorbing semi-immersed breakwater
J. Brossard, A. Jarno-Druaux, F. Marin and E.H. Tabet-Aoul 25

Suspended sediment transport under seiches in circular and elliptical basins
D. Pritchard and A.J. Hogg 43

Internal generation of waves in 2D fully elliptic mild-slope equation FEM models
G. Bellotti, G.M. Beltrami and P. De Girolamo 71

Characteristics of pressure pulses propagating through water-filled cracks
G. Müller, G. Wolters and M.J. Cooker 83

A curvilinear version of a quasi-3D nearshore circulation model
F. Shi, I.A. Svendsen, J.T. Kirby and J. McKee Smith 99

Wave field modification by bathymetric anomalies and resulting shoreline changes: a review with recent results
C.J. Bender and R.G. Dean 125

Research Papers

Effect of externally generated turbulence on wave boundary layer
J. Fredsøe, B.M. Sumer, A. Kozakiewicz, L.H.C. Chua and R. Deigaard 155

Modeling of waves and currents in the nearshore parametric vs. probabilistic approach
B.T. Grasmeijer and B.G. Ruessink 185

On berm breakwaters. Stability, scour, overtopping
A. Tørum, F. Kuhnen and A. Menze 209

Research Papers

Moving shoreline boundary condition for nearshore models
R.S. Prasad and I.A. Svendsen 239

Reversed responses within a segmented detached breakwater, the Tuscany coast Italy—a case study
D. Bowman and E. Pranzini 263

A video-based technique for mapping intertidal beach bathymetry
S.G.J. Aarninkhof, I.L. Turner, T.D.T. Dronkers, M. Caljouw and L. Nipius 275

Phase-decoupled refraction–diffraction for spectral wave models
L.H. Holthuijsen, A. Herman and N. Booij 291
